VICTOR TSEROVSKI

Senior Data Operations Analyst | AI-Assisted Software Development

Sofia, Bulgaria | victortserovski@gmail.com | +359 878 235 718 | Portfolio | LinkedIn

PROFESSIONAL SUMMARY

Senior Data Operations Analyst with 5+ years at NielsenIQ across data quality, KPI monitoring, process improvement, software deployment, documentation, and team support. Uses AI coding tools to turn practical requirements into tested browser, web, and desktop software. Brings a structured approach to problem definition, validation, edge-case testing, and multi-agent code review while continuing to strengthen programming fundamentals and professional engineering practice.

CORE SKILLS

Data and operations: KPI monitoring, data validation, data quality, process improvement, SOPs, incident handling, stakeholder coordination, training, documentation, JIRA, advanced Excel, and SQL fundamentals.
AI-assisted development: Claude Code, OpenAI Codex, Cursor, rapid prototyping, requirements, structured testing, AI-assisted debugging, and multi-agent code review.
Project environments used: Python/PyQt6, JavaScript, Next.js/React, Chrome Extensions MV3, Supabase, GitHub, GitHub Pages, Netlify, and Cloudflare R2.

SELECTED PROJECTS - AI-ASSISTED DEVELOPMENT

Independent projects built with AI coding tools. Responsibilities included defining requirements, mapping workflows, guiding implementation, testing behavior and edge cases, reviewing findings, documenting limits, and delivering the result.

Nova Control | Concrete plant desktop application | v2.0.4 | Real PLC test pending

- Mapped seven workflow sections and converted 40 answers from a concrete-plant expert into explicit production, material, reporting, and safety rules.
- Used Claude Code, Codex, and Cursor to build and review the application, then verified screens, calculations, saved data, restarts, controller connections, and simulated production through 2,635 automated tests.
- Kept machinery control with the plant operator and PLC: Nova exchanges recipe and production information but cannot start, stop, empty, reset, or directly control equipment.

Environment used: Claude Code, OpenAI Codex, Cursor, Python, PyQt6, Delta PLC communication, legacy Omron serial communication.

Fake Discount Bulgaria | Chrome and Edge extension | Live on Chrome Web Store

- Built and published an extension that records daily EUR price observations across 20 Bulgarian retailers and presents local price history through five understandable result states.
- Defined retailer-specific extraction rules for pages that update without reloading, EUR/BGN displays, unavailable products, manufacturer prices, legal 30-day references, and unrelated suggested products.
- Tested against saved real product pages and added bilingual UI, EAN capture, target prices, history search, and JSON backup. Cloud ingestion is best-effort and one-way; cross-store matching and background alerts remain future work.

Environment used: Claude Code, OpenAI Codex, JavaScript, Chrome Extensions MV3, Supabase, GitHub.

Malki Podaracheta | Next.js ordering website | Live | 81 static pages

- Mapped six event types and ten themes into 60 consistent customization routes, with a three-step order flow for products, personalization, delivery details, and review.
- Defined cart persistence, cross-tab synchronization, shareable links, saved-price checks, volume discounts, urgent-order warnings, and browser-side validation without adding an unnecessary custom backend or payment system.
- Tested stale prices, missing products, duplicate items, malformed shared links, incomplete personalization, and responsive behavior across the complete ordering flow.

Environment used: Claude Code, OpenAI Codex, Next.js 15, React 19, TypeScript, Cloudflare R2, Netlify.

SIMA-MA Industrial Website | Bulgarian and English manufacturer website | Staged

- Organized incomplete manufacturing material into 12 Bulgarian and English content pages covering equipment, completed work, inquiries, privacy information, and required EU documentation.
- Built a 93-image gallery in seven categories, keyboard and swipe navigation, a 120-particle background animation, and 16 procurement documents organized into five groups.
- Checked language consistency, responsive behavior, accessibility, contact-form validation, consent handling, search metadata, caching, and security headers.

Environment used: Claude Code, OpenAI Codex, HTML, CSS, JavaScript, Cloudflare R2, Netlify.

PROFESSIONAL EXPERIENCE

Senior Data Operations Analyst | NielsenIQ (AC Nielsen Bulgaria) | Jul 2026 - Present | Sofia, Bulgaria | Hybrid

- Monitor team KPIs and assigned processes, supporting performance discussions, process improvements, and new business implementations in line with Standard Operating Procedures.
- Evaluate an internal AI chatbot from an end-user perspective, checking whether its summaries and answers accurately reflect the available source data and giving practical feedback to the team improving it.
- Use AI prompting to examine complex datasets and identify trends more efficiently, validating findings against source data and operational context.
- Investigate operational issues, coordinate practical follow-up, and contribute to continuous improvement across assigned areas.
- Guide and train junior specialists, and contribute to or lead assigned workstreams through clear coordination and documentation in a multicultural environment.

Deployment Expert | NielsenIQ (AC Nielsen Bulgaria) | Nov 2025 - Jul 2026 | Sofia, Bulgaria | Hybrid

- Supported the migration to NielsenIQ Discover across assigned countries and coordinated progress, actions, and issue follow-up with country teams, managers, ROC, and the Discover Centre of Excellence.
- Helped design, document, and improve operational processes and procedures while supporting BAU continuity, knowledge transfer, training-needs identification, and structured handover.
- Monitored data delivery and quality, escalated critical issues, and prepared KPI reports and progress updates for management.

Senior Data Processing Specialist | NielsenIQ (AC Nielsen Bulgaria) | Feb 2024 - Nov 2025 | Sofia, Bulgaria | Hybrid

- Monitored team KPIs, supported process optimization and new business implementations, and maintained consistency with documented procedures.
- Used Excel and AI prompting to examine complex datasets, identify patterns, and support investigations while retaining human data-quality checks.
- Resolved operational issues and provided structured guidance and training to junior specialists in a multicultural team.

Deployment Specialist | NielsenIQ (AC Nielsen Bulgaria) | Apr 2023 - Feb 2024 | Sofia, Bulgaria | Hybrid

- Investigated conflicts between deployment-process components, supported pre-release preparation and post-release stabilization, and helped troubleshoot live issues.
- Trained users in system operation and error correction, tracked releases through JIRA, and proposed practical improvements aligned with operational and client requirements.

Data Processing Specialist | NielsenIQ (AC Nielsen Bulgaria) | Mar 2021 - Apr 2023 | Sofia, Bulgaria | Hybrid

- Maintained database integrity for more than 100 clients through systematic data creation, error correction, Excel-based checks, and quality assurance before delivery.
- Managed concurrent projects under strict deadlines and coordinated cross-European communication on system and workflow changes.
- Led onboarding and training for seven colleagues, created procedural guides, and maintained confidentiality controls for sensitive client data.

Business Data Analyst | Publix Ltd | Dec 2020 - Feb 2021 | Sofia, Bulgaria | On-site

- Collected, maintained, profiled, and cleansed business data to improve record quality and reporting readiness.
- Worked with business and IT teams on data-collection improvements, customer-information analysis, implementation activities, and database maintenance.

ADDITIONAL EXPERIENCE AND INTERNATIONAL PROJECTS

ERASMUS Exchange Program | Brno University of Technology | May 2019 - Oct 2019 | Brno, Czech Republic | On-site

- Contributed to a device concept for bacterial analysis, prepared reports, identified potential issues, and discussed findings with the supervising researcher in an international environment.

Sales Agent - South Africa | BlueBear Technologies Ltd. | Mar 2018 - Jun 2018 | Sofia, Bulgaria | On-site

- Presented trading services to prospective clients, maintained follow-up communication, and developed customer-service skills in a fast-paced international sales environment.

ERASMUS Exchange Program | Universidade de Aveiro | Jun 2016 - Jan 2017 | Aveiro, Portugal | On-site

- Completed a diploma project on face detection and recognition using MATLAB and Batch Photo and produced a promotional video with Camtasia Studio and Adobe After Effects.

Logistics Coordinator - Intern | Lufthansa Technik Sofia | Jan 2016 - May 2016 | Sofia, Bulgaria | On-site

- Created Excel KPI reports, supported process analysis, prepared presentations, and wrote practical reporting guides for employees and future interns.

Procurement Specialist - Intern | Vivacom | Jul 2014 - Oct 2014 | Sofia, Bulgaria | On-site

- Researched suppliers, obtained quotations, supported procurement auctions, created SAP purchase-order and RFP records, and compared commercial offers.

EDUCATION

Master of Science - e-Management | Technical University of Sofia | 2015 - 2018 | Certificate of Excellence for Outstanding Academic Achievements

Bachelor of Science - Industrial Engineering | Technical University of Sofia | 2011 - 2015

Secondary Education - Mathematics and Natural Sciences with intensive English | 138 Vasil Zlatarski High School | 2011

CERTIFICATIONS, LANGUAGES AND INTERESTS

Certifications: Microsoft Excel - TOP 5, ITraining (2016); Presentation Skills Training, Vivacom (2014); English Language Course, Cambridge Schools Association - 648 hours (2007).
Languages: Bulgarian - Native; English - Professional; Portuguese - Beginner; Japanese - Beginner.
Interests: AI and LLM technologies; independent software projects; billiards; ancient languages (Latin and Sanskrit).
